## THE 20th ANNIVERSARY MEETING

The 10th Barcelona Liver Meeting has three major differences with respect to previous events. The first is that the duration will be 4 days. The second is that major sponsors that have supported the Meeting during its 20-years history will participate in the program. This represents a recognition of the organizers for their help. Finally, there will be a 20th Anniversary Barcelona Liver Meeting Symposium chaired by Prof Juan Rodés dealing with the past, present and future of therapy in the most prevalent liver problems. Professor Rodés was the first Director of the Liver Unit of Barcelona and one of the most outstanding investigators in Clinical Hepatology.
